**NORTHERN IRELAND-BASED IT COMPANY ANNOUNCES ESTABLISHMENT OF
MASSACHUSETTS LOCATION**

***TotalMobile Inc. offering mobile software products to State and municipalities opens
office in Boston***

Boston, MA – Monday, October 27, 2008 – TotalMobile Inc., a leading supplier of mobile software products, announced today the establishment of a Massachusetts office. Lieutenant Governor Murray met with representatives of TotalMobile Inc. and the Massachusetts Office of International Trade & Investment (MOITI) today to finalize and announce TotalMobile's New England Regional Headquarters. TotalMobile Inc. offers a range of software applications specifically designed to run on mobile devices and which deliver significant efficiency savings while improving customer service. The applications are aimed at state and municipal governments as well as educational and public safety organizations. TotalMobile estimates upwards of 40 jobs being created through both TotalMobile and third party resellers.

"I am proud to welcome TotalMobile to Massachusetts as its products will allow Massachusetts cities and towns to run more efficiently. This move also highlights the benefits of a strong relationship between Massachusetts and Northern Ireland where the direct results are felt in the form of job creation here in the Commonwealth," said Lieutenant Governor Murray.

The City of Lawrence has already identified and targeted the implementation of TotalMobile solutions across various departments including Fire Safety and Inspection, Public Safety, Building Inspections, Incident Capture, Public Works, Parking and Community Services. As the first municipality in the Commonwealth to employ TotalMobile Inc's products, the City of Lawrence has offered to serve as a point of reference for other Massachusetts cities and towns interested in TotalMobile's products.

"The TotalMobile Solutions offers the City of Lawrence innovative ways to make government more efficient. When cities and towns take the lead and partner with innovative companies like TotalMobile Inc. it's the taxpayer that really wins. The City of Lawrence looks forward to a long and productive relationship with TotalMobile Inc.," said the City of Lawrence Mayor Michael Sullivan.

"TotalMobile delivers significant efficiency savings to State and local government and allows them to do more with less. We see major opportunities in the United States, building on our success in the U.K. and Ireland. Massachusetts is an ideal location for us. It has a great pro-business culture and Government, a wealth of IT skills and excellent transport links, which will allow us to serve the whole of New England," said Colin Reid, Chief Executive Officer, TotalMobile Inc.

Boston-based CBE Technologies Inc. will be a primary reseller of TotalMobile business solutions in the New England market.
